

Customer information

Certificates for the Internet Payment Gateway

Upon activation of your account on the Internet Payment Gateway, you will receive two certificates and zip archive files.

IPG_Certificate_WSStoreID._.1.zip
IPG_TechnicalCertificate_WSStoreID._.1.zip
geotrust.pem
ipg-truststore.jks

API

For the API you need to authenticate the certificates. The following two archives are included:

The archive IPG_Certificate_WSStoreID._.1.zip includes following Data
WSStoreID._.1.key
WSStoreID._.1.pem
WSStoreID._.1.p12

The archive IPG_TechnicalCertificate_WSStoreID._.1.zip contains the following file:
WSStoreID._.1.kcs

For connections with CURL/PHP the .key, .pem and geotrust.pem certificate is used.

For connections with .NET the .p12 certificate is used.

For connections with JAVA the .kcs Certificate and ipg-truststore.jks is used.

Depending on the environment you use, there might exist the need to install rootcertificates from our web server. The rootcertificates can be requested at internet.support@telecash.de.
